CAREER OBJECTIVE

Motivated Computer Science and Engineering student with strong knowledge of data structures, algorithms, and software development principles. Seeking a technical role to apply analytical thinking and programming skills in building efficient, scalable, and innovative solutions.

EDUCATION QUALIFICATION

- **Bachelor of Engineering –Computer Science & Engineering**
xyz, Bengaluru
9.43, 2027 (Pursuing)
 - **Pre-University Board- Science**
xyz, Chikkaballapur
94.00%, 2023
 - **SSLC**
xyz, Doddaballapur
99.68%, 2021
-

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Software: Visual Studio Code, Jupyter Notebook, Eclipse

Operating Systems: Windows, Ubuntu, Linux

Web Technologies: HTML/CSS/JS

Database: SQL

PROJECTS

- **Annual Report Portal**
 - Developed a console-based Annual Report Management System in C featuring a structured, menu-driven interface for efficient creation, retrieval, updating, and deletion of annual report records.
 - Implemented reliable file handling mechanisms and optimized search functionalities to ensure persistent data storage and quick access to reports by ID or year.
 - Applied modular and structured programming principles to enhance scalability, maintainability, and clean code organization.
 - **Tech Stack:** C, File Handling, Structured Programming
- **Medical Report Management**
 - Developed a Medical Report Management System to efficiently create, store, and retrieve patient records including histories, diagnoses, and treatment plans, improving data accessibility and reducing manual paperwork.
 - Implemented secure authentication and role-based access control, ensuring data privacy and controlled access for healthcare professionals.
 - Applied Built features like report generation, PDF export, search functionality, and data encryption, enhancing system efficiency, accuracy, and secure handling of medical information.
 - **Tech Stack:** Python, JavaScript, JS, MySQL

- **Granite Inventory & Billing System**
 - Developed a full-stack web application for granite inventory and billing management with efficient data handling.
 - Implemented key features including secure user authentication, password hashing, dynamic invoice generation, and real-time stock updates.
 - Designed a responsive dashboard with sales analytics and reporting for better business insights.
 - **Tech Stack:** HTML5, CSS3, JavaScript, Bootstrap, PHP, MySQL.
-

CO-CURRICULAR AND EXTRA CURRICULAR ACTIVITIES

- **Online Course & Certification:**
 - Certified in topic "Introduction to Python" from Infosys Springboard.
 - Certified a course in the topic "C Programming" from Udemy.
 - Certified in topic "Java Programming" from Udemy.
 - **Industrial Visit:**
 - Participated in an **Industrial Visit to Baking Technology**, learning about industrial-scale food processing and baking technology.
 - **Non-technical club activities:**
 - Volunteered in Krishna Janmashtami Celebration.
 - **NSS:**
 - Performed Report and Analysis on "Organic Farming Practices".
 - **Student Tutor:**
 - Provided consistent academic support to peers by tutoring, enhancing both subject mastery and interpersonal communication skills.
-

PERSONAL DETAILS

Date of Birth	: xyz
Gender	: Female
Nationality	: Indian
Permanent Address	: Karnataka- 563130
Linguistic Competency	: Kannada, English
Hobbies	: Cooking, Craftwork, Listening music
